Guided Search Creation

The screenshot shows a web application interface for creating guided searches. At the top, a dark navigation bar contains the logo and links for SEARCH, ANSWERS, PINBOARD, SPOTIQ, DATA, and ADMIN. On the right of the navigation bar are user icons. Below the navigation bar, the main content area is titled 'Retail Sporting Goods' with a dropdown arrow. To the left of the main content is a sidebar with a search bar labeled 'Search Columns' and a list of available columns: Age Group, Average Basket Size, avg monthly sales, Brand, Campaign - Coupons Retrieved, Campaign - Email Clicks, Campaign - Email Opens, Campaign Name, Channel, Cost, Customer City, Customer Country, Customer Gender, Customer Key, Customer Name, Customer Region, Customer State, Customer Zip Code, Date, Department, Gross Margin, Income Bracket, Latitude, Longitude, Margin Percentage, and Months Since Launch. The main content area features a header with a plus icon and three active filters: 'sales', 'age group', and 'Customer city = San Francisco'. Below this header is a section titled 'Select one to get started' with a close icon. This section contains six cards: 1. 'Add a Measure' (green background) with a plus icon, explaining that measures are numbers for calculations, and showing sample buttons for 'Sales' and 'Profit'. 2. 'Add an Attribute' (blue background) with a question mark icon, explaining that attributes describe measures, and showing sample buttons for 'Region' and 'Customer Name'. 3. 'Add a Filter' (light gray background) with a downward arrow icon, explaining that filters narrow results, and showing sample buttons for 'Sales >1 million' and 'Region = west'. 4. 'Try 'Vs' Comparison' (purple background) with a 'VS' icon, explaining that filters narrow results for comparisons, and showing sample buttons for 'austin vs new york' and 'east vs west'. 5. 'Growth of...' (yellow background) with a downward arrow icon, explaining that filters narrow results for growth, and showing a sample button for 'Growth of revenue by date'. 6. 'Try in(query)' (light gray background) with a downward arrow icon, explaining that filters narrow results for queries, and showing sample buttons for 'Sales >1 million' and 'Region West'. A 'Show less' button is located at the bottom left of the 'Select one to get started' section.

Network

The creation and consumption model in enterprise BI & Analytics is outdated

- Hub and spoke model
- Only few people can create
- Passive, lonely consumption
- No harnessing of the “wisdom of the crowd”

Personalizing consumption of enterprise data

Universal Search

The screenshot displays the Universal Search interface. At the top, a dark blue navigation bar contains the logo and menu items: SEARCH, ANSWERS, PINBOARDS, SPOTIQ, and DATA. On the right of this bar are a help icon (?) and a user profile picture. Below the navigation bar is a large white search input field containing the text 'store performance' and a microphone icon. To the right of the input field is a link that says 'Create a new Answer'. Below the search bar, it states '11 results found'. The first result is a 'PINBOARD' titled 'Store Performance' with the subtitle 'Recent store and regional performance'. It features a bar chart with 10 orange bars of varying heights. Below the chart, it says 'Top 10 Stores by Gross Margin, Last 60 D...' and '18 hours ago'. To the left of the chart, there is a user profile picture and the name 'Retail', and a view count of '133'. The second result is an 'ANSWER' titled 'Store Comparison Qty vs Revenue', which is partially visible and includes a scatter plot with yellow, green, and blue dots. In the bottom left corner of the interface, there is a small 'Video player' button.

Data Integration

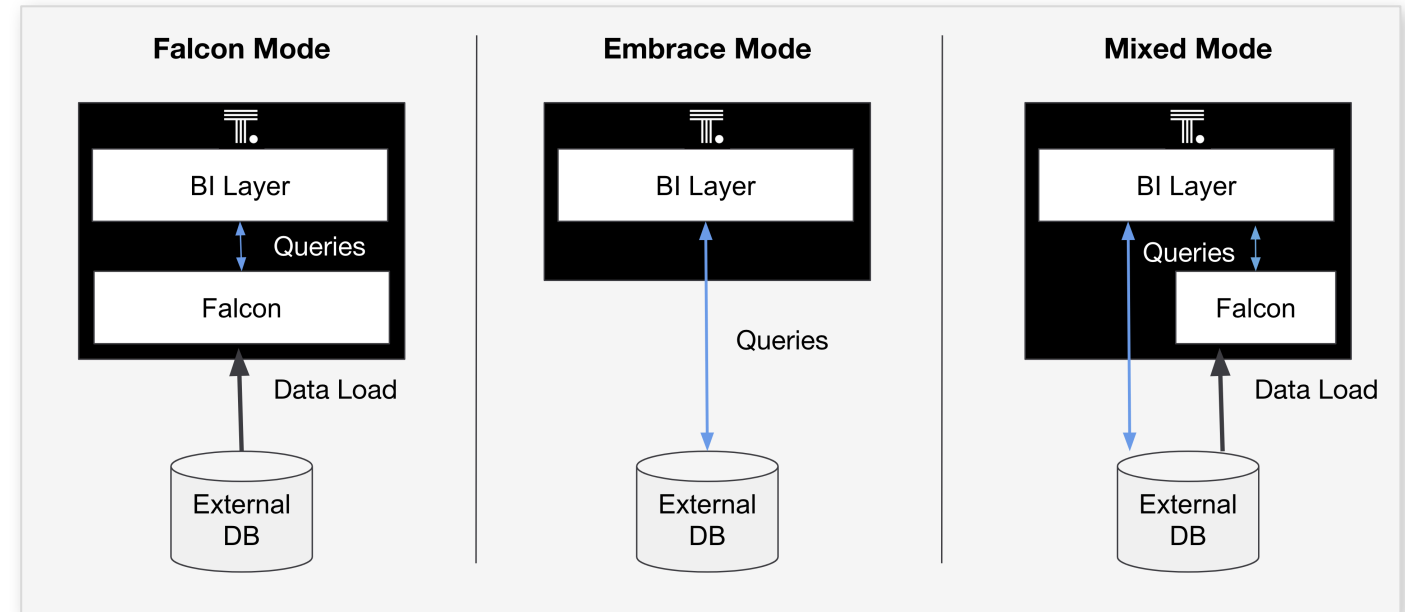

One click data loading

Embrace

LiveQuery technology
Snowflake support
Other cloud data warehouses

Data Ingestion

TSload as a service
JDBC / ODBC enhancements
Sync for on premises data warehouses
Sync for cloud data warehouses

Cloud

Most scalable, cloud-centric analytics platform at the lowest cost

Cost reduction

Support for multiple instance types

Persistent storage improvements

Data compression

Look and feel customization
Javascript SDK
Multi-tenancy

Worksheet & Object Scriptability

Self Service Cluster Administration

The image displays three overlapping dialog boxes from a self-service cluster administration interface. The background dialog, 'Configure Authentication: Active Directory', is partially obscured. The foreground dialog on the left, 'Add Mount Point', contains fields for 'Mount Type' (radio buttons for NFS and CIFS), 'Server Address', 'Path on Server', 'Local Mount Point', and 'Optional Mount Parameters' (with a note about command-line options). The foreground dialog on the right, 'Configure SSL', includes 'SSL Status' (radio buttons for Enable and Disable), 'Choose RSA Algorithm' (a dropdown menu showing 'RSA'), 'Choose Minimum TLS Version' (a dropdown menu showing 'TLS 1.2'), 'Private Key' (with a 'Browse File' button), and 'SSL certificate bundle' (also with a 'Browse File' button'). Each dialog has 'Cancel' and 'OK' or 'Save' buttons at the bottom.
