

AD301

# ThoughtSpot Architect Essentials

TS101: Introduction to ThoughtSpot | TS201: ThoughtSpot Advanced End User | AD301: ThoughtSpot Architect Essentials

This course focuses on the main technical topics and best practices around ThoughtSpot implementation. Through lecture and hands-on exercises, participants will begin by learning about data loading in ThoughtSpot. Modeling and optimizing that data for the ThoughtSpot search experience will also be covered in detail. Advanced topics including formula creation, using views, and making use of row level security to ensure ThoughtSpot users only see the data they have permission to will round out this informative session.

## This course covers the following topics:

- Preparing data for loading
- Creating the schema
- Loading the data
- Exploring data management
- Creating worksheets
- Creating formulas
- Views
- Setting row level security

---

This course is for Implementers and Administrators

4 hours

\$395\*

Prerequisites:

TS201: ThoughtSpot Advanced End User or equivalent experience

---

Participants must bring their own laptop to the session.

\*If you register for both this course and TS201: ThoughtSpot Advanced End User the total cost will be \$750, a \$40 savings.
