

TS101

# Introduction to ThoughtSpot

TS101: Introduction to ThoughtSpot | TS201: ThoughtSpot Advanced End User | AD301: ThoughtSpot Architect Essentials

This course is for anyone who is new to ThoughtSpot and would like to learn the basics of using search and AI to analyze their data. Kick-start your analytics program with our complimentary Level 1 course, which is most relevant when organizations are designing and re-envisioning their approach to data and analytics. Through hands-on lecture, participants will discover the core end user features and functionality of ThoughtSpot.

## This course covers the following topics:

- What is ThoughtSpot?
- Using SearchIQ
- Answers & Pinboards
- Mastering basic searches
- Changing the visualization
- Drilling on data
- Using filters

---

This course is for anyone interested in a hands-on overview of ThoughtSpot search functionality

1 hour

Free

No prerequisites
