

TS201

ThoughtSpot

Advanced End User

TS101: Introduction to ThoughtSpot | TS201: ThoughtSpot Advanced End User | AD301: ThoughtSpot Architect Essentials

Go beyond the basics of the end user features covered in the Introduction to ThoughtSpot course to discover the advanced analytic capabilities of the platform. During this hands-on, interactive course you will dive deeper into Pinboard creation, formatting your results, and using SpotIQ to find answers to questions you didn't even know to ask of your data. Using your training in basic search as a springboard, you will learn how to do more advanced searches using ThoughtSpot Keywords like *growth of*, *versus*, and the many time-based keywords. Finally, you will learn how to create your own custom attributes and measures using formulas to take your analyses to the next level.

This course covers the following topics:

- Answer & Pinboard creation
- Using SpotIQ
- Advanced Searches
- Conditional formatting
- Creating formulas
- Uploading data

This course is for Advanced End Users, Analysts, Implementers, and Administrators

4 hours

\$395*

Prerequisites:

TS101: Introduction to ThoughtSpot or equivalent experience

Participants must bring their own laptop to the session.

*If you register for both this course and AD301: ThoughtSpot Architect Essentials the total cost will be \$750 USD, a \$40 savings.
