

ThoughtSpot Cloud

Fully managed SaaS solution

ThoughtSpot Cloud provides a turnkey search and AI-driven analytics solution, fully managed in the cloud. We'll manage your platform so everyone in your organization is empowered to make smarter decisions with fast and easy access to data.

Start in Minutes

Start searching in minutes. No hardware required

Live Connections

Preview and select tables and columns you want to analyze

Fully Managed

Leave the infrastructure management and software upgrades to us

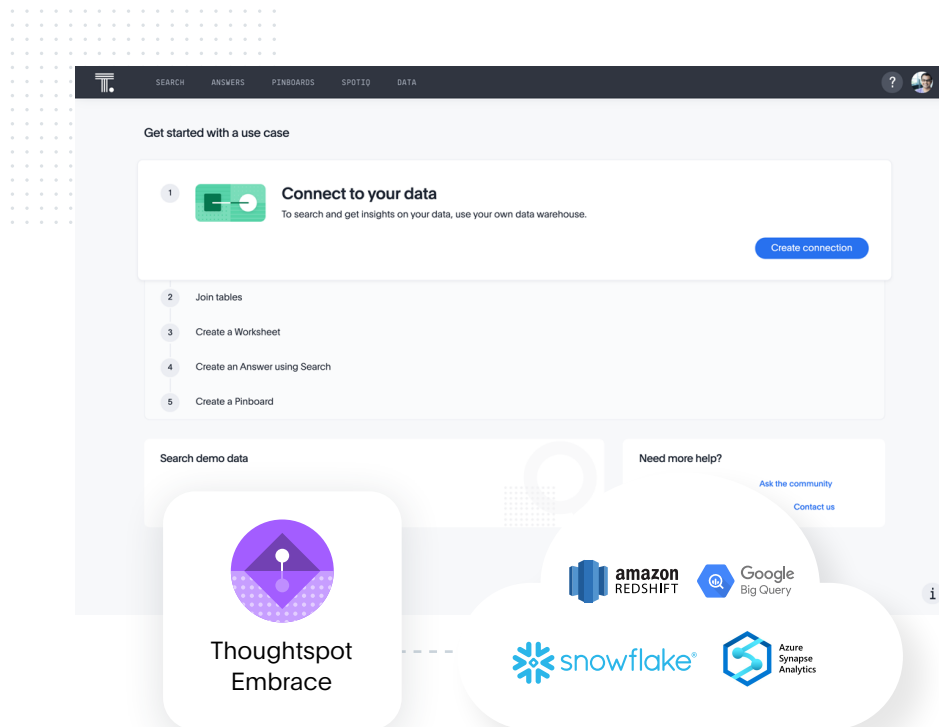

Enterprise-Grade Security

Enterprise-grade security, governance, and protection ensures your data is always safe

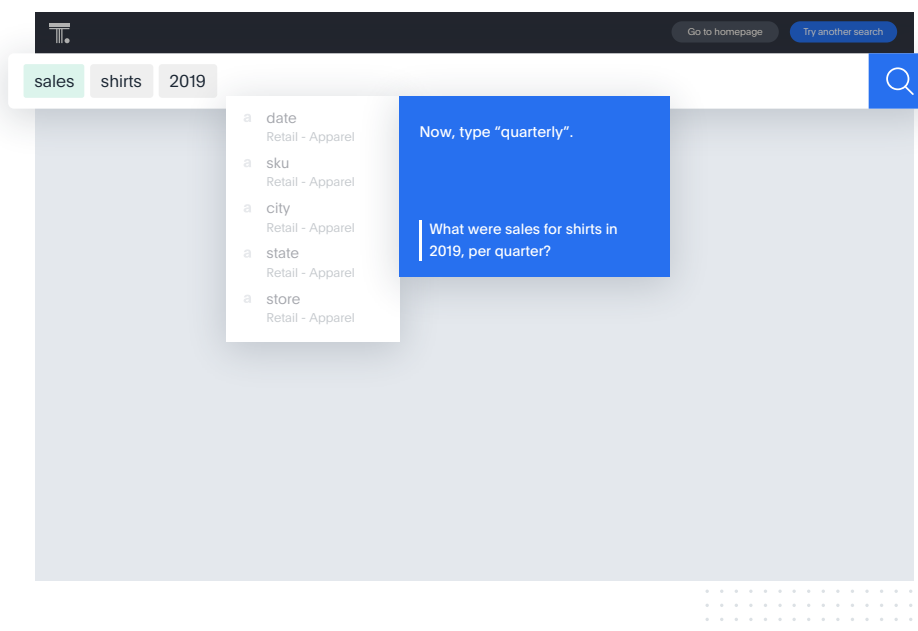

Connect to your favorite cloud databases in a few clicks

Live-query cloud databases like Snowflake and Amazon Redshift with ThoughtSpot Embrace to get the most up-to-date insights on your data. No data movement required.

Onboard and find insights in minutes

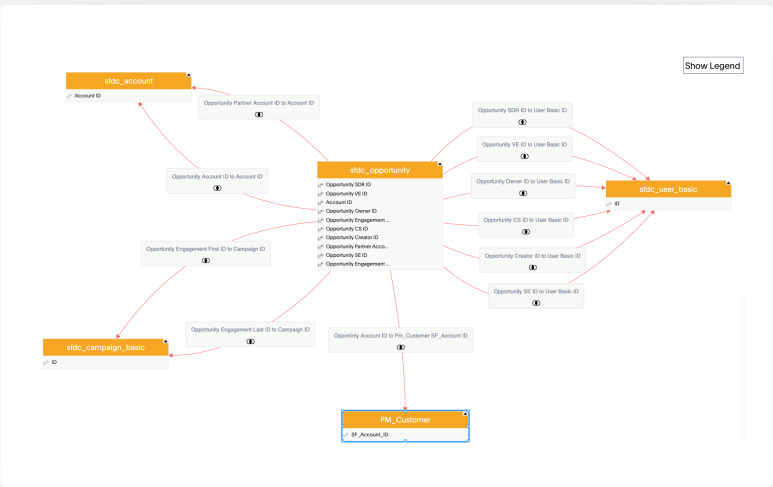

Take the fastest path to that "A-ha" moment. Get onboarded in minutes, and let Search Assist walk you through a personalized search experience.

Accelerate time-to-value with pre-built SpotApps

Get analytics tailored to your business needs with low-code templates for the most popular business applications.
