

Search & AI-Driven Analytics for Procurement

Make Supplier 360 a Reality

Procurement professionals from the world's leading brands use ThoughtSpot to uncover insights around cost, quality, delivery, and risk, measure supplier performance, and better manage supplier relationships.

Use search to get granular insights and quickly drill into which suppliers are contributing to problems, with which products, and at which locations to create a plan to bridge the cost savings gap. You can even replicate this same ad-hoc approach for quality issues, delivery, and more.

ThoughtSpot will help provide you a Supplier 360 view, giving you visibility across all the dimensions of a supplier's performance to help your business develop more data-driven strategic sourcing and vendor negotiations.

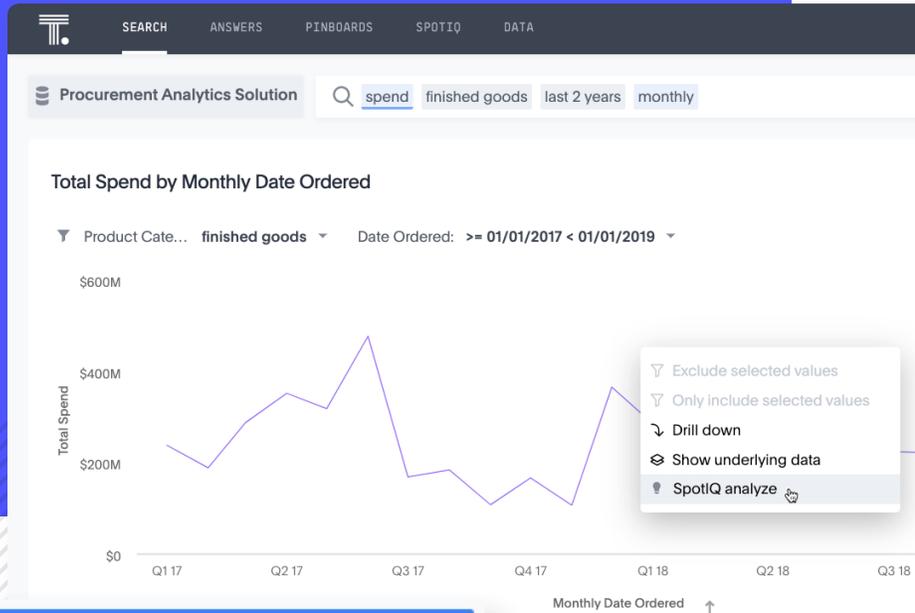

85%

ThoughtSpot deploys 85 percent faster than legacy technologies, connecting with any on-premises, cloud, big data, or desktop data source.

Get AI-Driven Insights with SpotIQ

SpotIQ, ThoughtSpot's AI-driven insights engine, automatically performs anomaly detection and root cause analysis to help you get to the 'why' behind all your questions. It can run thousands of queries across millions of rows, and return relevant, personalized insights in seconds.
