

Search & AI-Driven Procurement Analytics

You are generating more data than ever before about supplier cost, risk, timeliness, and quality. The majority of this data is generated outside your corporate firewall, making it ideal to store and analyze in the cloud.

With Procurement Analytics from Snowflake and ThoughtSpot, you can uncover deep supplier insights on Snowflake's high performance, zero management built-for-the-cloud data warehouse. Simply connect, select your procurement data, and start searching. Queries run where the data lives to give you the most up-to-date answers.

Why Snowflake + ThoughtSpot for Procurement Analytics

Simple

True self-service in the cloud for everyone

Smart

AI-driven insights so you know sooner

Fast

Lightning fast answers on billions of rows in your cloud data warehouse

Give Every Procurement Professional Fast and Easy Access to Granular Insights

With ThoughtSpot, you can empower everyone in your organization with fast, easy access to search and AI-driven analytics on procurement data in Snowflake, so they can make smarter decisions around supplier cost, risk, timeliness, and quality.
