

About ThoughtSpot

ThoughtSpot aims to eliminate the need for complex business intelligence tools for enterprise data analysis. ThoughtSpot Relational Search Appliance combines data from on-premise, cloud and desktop data sources and enables enterprise users to access them through a simple search interface while providing enterprise-class scalability, security and manageability for IT. ThoughtSpot founders have a track record of starting Nutanix, a \$2B enterprise technology company that's on its way to an IPO, and building market-defining search and analytics technologies at companies such as Google, Amazon, Oracle, and Microsoft. Based in Palo Alto, CA, ThoughtSpot has raised \$40.7 million from Lightspeed Venture Partners, Khosla Ventures and top-tier angel investors. For more information visit <http://www.thoughtspot.com>.
